50X1-HUM

1. Zeiss Ikon of Dresden has received from the Soviet authorities, films  containing plans for a target camera . It is entirely possible that the target camera manufactured in Dresden is already being built after these plans. The Soviet authorities apparently are not satisfied with the camera Dresden was making, because a beginning had been made on efforts to improve it.
2. Production of a new telephoto camera will commence at the end of June 1954. The development work has been completed. The camera is intended for the export trade.
3. There is no change in the production or mechanisms for proximity fuses and parts for torpedoes.
